

SAURAV KUMAR

Full Stack Developer | MERN Stack Specialist

Jaipur, Rajasthan | +91 95708 23816 | pandeysaurav878@gmail.com

LinkedIn: www.linkedin.com/in/pandeyaurav | GitHub: <https://github.com/Saurav-TB-Pandey> | Portfolio: saurav-tb-pandey.vercel.app

PROFESSIONAL OBJECTIVE

Results-driven Full Stack Developer with 3+ years of hands-on experience in building scalable, secure, and high-performance web applications using the MERN stack. Seeking to leverage expertise in full-stack development, cloud deployment, and API integrations to contribute to innovative projects and drive business growth. Proven track record of delivering HIPAA-compliant healthcare solutions, enterprise-grade applications, and real-time systems across diverse industries.

PROFESSIONAL SUMMARY

Full Stack Developer with 3+ years of experience specializing in MERN stack (MongoDB, Express.js, React.js, Node.js) development, third-party integrations, and AWS cloud deployment. Expertise in building scalable, secure applications with JWT authentication, WebSocket real-time communication, and RESTful API development. Successfully delivered production-grade solutions across healthcare, automotive, and enterprise domains. Strong proficiency in database optimization, API design, and cross-functional collaboration. Certified in MuleSoft Integration and SQL with a proven ability to work independently and as part of agile teams.

PROFESSIONAL EXPERIENCE

SoftSensor AI | Jaipur, Rajasthan

June 2026 – Present

Senior Software Engineer L1

Responsibilities:

- Spearheaded optimizations of company products, enhancing performance and efficiency through effective code improvements
- Developed and implemented new features and functionalities, significantly elevating user experience and product value
- Deployed applications on AWS using CI/CD practices, ensuring smooth and reliable releases through automated processes
- Utilized Docker for containerization, facilitating easier deployment and scalability of microservices-based solutions
- Leveraged multiple databases including PostgreSQL, MongoDB, and MySQL for efficient data management and retrieval
- Collaborated within a MERN stack environment, employing React.js and Node.js to deliver dynamic and responsive web applications

smartData Enterprises | Mohali, Punjab

October 2023 – June 2026

Associate Software Developer - II | August 2025 – June 2026

Responsibilities:

- Lead end-to-end development of scalable web systems using MERN stack architecture
- Design and implement secure, modular RESTful APIs with comprehensive validation using Joi and Yup
- Develop real-time features using WebSocket for live notifications and seamless user interactions
- Collaborate with cross-functional teams including UI/UX designers, QA engineers, and product managers
- Optimize database queries and API endpoints for improved performance and scalability
- Implement security best practices including JWT authentication, data encryption, and role-based access control
- Deploy and maintain applications on AWS cloud infrastructure (EC2, S3, Textract, Lambda)
- Conduct code reviews and mentor junior developers on best practices

Associate Software Developer - I | September 2024 – July 2025

Responsibilities:

- Developed and maintained full-stack web applications using React.js, Node.js, and Express.js
- Created responsive UI components using Material UI, Bootstrap, and custom CSS
- Integrated third-party APIs and services including payment gateways and notification systems
- Implemented state management using Redux for complex application workflows
- Wrote unit tests and integration tests to ensure code quality
- Participated in agile ceremonies including sprint planning, daily stand-ups, and retrospectives

Associate Software Developer Intern | October 2023 – August 2024

Responsibilities:

- Received comprehensive training in MERN stack technologies and best practices
- Collaborated with senior developers on multiple web application projects
- Contributed to frontend development using React.js and backend development using Node.js
- Participated in code reviews and learned industry-standard coding practices
- Assisted in debugging and fixing production issues
- Documented code and technical specifications

Technical Associate

Caelius Consulting | Mohali, Punjab

February 2023 – August 2023

Responsibilities:

- Developed and maintained enterprise APIs using MuleSoft platform
- Analyzed API performance metrics and identified optimization opportunities
- Supported complete API development lifecycle from requirements gathering to deployment
- Collaborated with clients to understand integration requirements
- Ensured seamless service delivery through proactive monitoring and issue resolution
- Documented API specifications and integration patterns

TECHNICAL PROJECTS

Continuity Connect (Healthcare - Care Provider & Aged Care Management Platform) | Full Stack Developer

September 2025 – June 2026

URL: <https://continuityconnect.com.au/>

Project Description: Contributed to the development of a unified digital platform supporting employee, contractor, and partnership-based care providers, enabling coordinated care delivery across organizations. The system streamlines aged care services and home care packages with integrated care planning, documentation, compliance, scheduling, and collaboration tools—improving care quality, operational efficiency, and secure multi-provider coordination.

Key Responsibilities:

- Developed frontend features using React.js and Tailwind CSS for responsive and modern user interfaces
- Implemented care planning, documentation, compliance, and scheduling modules using Node.js and TypeScript
- Built RESTful APIs with Express.js and Prisma ORM for efficient data management and query optimization
- Worked with PostgreSQL database for data storage, retrieval, and schema design
- Designed and implemented database schemas and optimized database queries for better performance
- Collaborated with team of 8-12 developers in agile environment, participating in sprint planning and daily stand-ups
- Implemented proper error handling and logging for all microservices

Technologies: React.js, Node.js, Express.js, PostgreSQL, Prisma ORM, TypeScript, Tailwind CSS, Stripe, Xero, Telnyx, LiveKit, WebSockets, Google Maps, PRODA (Australian Government API), AWS (S3, Textract, Lambda, EC2)

Family Health Hub (Healthcare Platform) | Full Stack Developer

June 2025 – August 2025

URL: <https://familyhealthhub.com/>

Project Description: Led the end-to-end development of a HIPAA-compliant web-based healthcare platform designed to streamline appointment booking, role-based access control, and management of patients, healthcare professionals, and services. The system enables users to submit detailed patient intake forms capturing personal information, medical history, current health issues, and self-assessments.

Key Responsibilities:

- Architected and developed complete full-stack application from scratch
- Built appointment scheduling workflows with real-time availability checking
- Implemented role-based dashboards for healthcare professionals and business managers using JWT-based authentication
- Ensured HIPAA compliance through encryption of sensitive patient data at rest and in transit
- Designed and implemented modules for healthcare professional onboarding, service listings, and appointment management
- Developed SMTP-based email notification workflows for real-time updates and confirmations
- Deployed application on AWS EC2 with secure asset management on AWS S3
- Implemented comprehensive error handling and logging mechanisms

Technologies: React.js, Node.js, Express.js, MySQL, Material UI, Bootstrap, AWS EC2, AWS S3, JWT, SMTP, WebSocket

AiVisor (Automotive Service Appointment Scheduler) | Full Stack Developer

February 2025 – May 2025

Project Description: Developed an end-to-end vehicle service appointment scheduling platform for car dealerships, enabling streamlined booking, updates, and cancellation through Xtime integration.

Key Responsibilities:

- Built dynamic appointment forms using React.js, Redux, and Yup with robust form validation
- Developed RESTful APIs with Node.js and Express for appointment CRUD operations
- Integrated Xtime APIs to fetch real-time customer, vehicle, appointment, and service data
- Applied Joi validation schemas for backend input validation on customer, vehicle, and services information
- Implemented responsive UI with real-time availability logic and enhanced user experience
- Created service recommendation engine based on vehicle history

Technologies: React.js, Redux, Node.js, Express.js, Yup, Joi, Xtime API Integration, RESTful APIs

SafeSphere (QHSE Management Solution) | Full Stack Developer

February 2024 – January 2025

URL: <https://safesphere.isafetylog.com/>

Project Description: Developed a PaaS-based QHSE (Quality, Health, Safety, and Environment) management solution aimed at enhancing safety performance and regulatory compliance for high-risk industries including Oil & Gas, Construction, and Manufacturing.

Phase 1 (February 2024 – August 2024):

- Implemented functionality for reporting Incident, Observation, and Safety Data Entry
- Developed comprehensive super admin section to manage organizational profiles, user configuration, locations, departments, clients, contractors, and risks
- Led API and frontend development while interacting with clients to align project with their needs
- Built analytics dashboard for report creation, management, and insights

Phase 2 (September 2024 – January 2025):

- Expanded reporting functionality to include Meeting reports, Management of Change (MoC) reports, and Risk Assessment reports
- Added investigation capabilities to Observation and Incident reports
- Enhanced super admin functionality for better user and organizational management
- Implemented advanced filtering and search capabilities

Technologies: React.js, Node.js, Express.js, MongoDB, RESTful APIs, Bootstrap, CSS3

IHG (InterContinental Hotels Group) | API Developer

February 2023 – August 2023

URL: <https://www.ihg.com/>

Project Description: Developed and maintained APIs for IHG utilizing MuleSoft technology to enhance scalability and guest experiences.

Key Responsibilities:

- Developed scalable APIs using MuleSoft platform
- Monitored API performance and ensured seamless service delivery
- Collaborated with stakeholders to understand business requirements
- Implemented error handling and logging mechanisms

Technologies: MuleSoft, API Development, Integration Services, RESTful APIs

TECHNICAL SKILLS

Programming Languages: JavaScript, TypeScript

Frontend Technologies: React.js, Redux, Material UI, Bootstrap, Tailwind CSS, HTML5, CSS3, Responsive Design

Backend Technologies: Node.js, Express.js, RESTful APIs, WebSocket, Microservices Architecture

Databases: MySQL, MongoDB, PostgreSQL, Database Design, Query Optimization

Cloud & DevOps: AWS EC2, AWS S3, AWS Textract, AWS Lambda, Git, Jenkins, CI/CD, Docker (Basic)

Tools & Technologies: Postman, Jira, WebSocket, SMTP, API Integrations, MuleSoft

Methodologies & Practices: Agile/Scrum, API Development Lifecycle, HIPAA Compliance, Test-Driven Development, Code Review

EDUCATION

Bachelor of Technology in Computer Science Engineering

Swami Vivekanand Institute of Engineering and Technology, Punjab

GPA: 8.21/10 | November 2020 – June 2024

CERTIFICATIONS

- MuleSoft Certified Integration Associate | MuleSoft | 2023
- SQL Certification | HackerRank | 2023

LANGUAGES

- Hindi: Native/Fluent
- English: Fluent (Professional Proficiency)

ADDITIONAL INFORMATION

Availability: Available for relocation and remote work opportunities

Willingness to Learn: Continuously learning and adapting to new technologies and tools

Soft Skills: Strong problem-solving, analytical thinking, collaboration, and communication abilities

Interests: Web development, cloud computing, API design, open-source contributions
